# U.S. FOREIGN CURRENT SERIAL RECORDS AGRICULTURAL TRADE BY COMMODITIES FISCAL YEAR 1963-64

A SUPPLEMENT TO THE MONTHLY FOREIGN AGRICULTURAL TRADE OF THE UNITED STATES

Economic Research Service U.S. DEPARTMENT OF AGRICULTURE

#### CONTENTS

	rage
Exports and Imports: Table 1 Value: Principal agricultural commodity groups, 1962-63 and 1963-64 Table 2 Value: Agricultural and total foreign trade, 1963-64 with comparisons Table 10 Quantity indexes: Agricultural commodity groups, 1963-64 with comparisons	1 2 41
Exports: Table 3 Valua: Selected commodities and groups, 1963-64 with comparisons Table 4 Quantity: Selected commodities and groups, 1963-64 with comparisons Table 5 Quantity and value: Agricultural commodities, 1962-63 and 1963-64	3-4 5-8 9-19
Imports: Table 6 Value: Agricultural import totals, 1963-64 with comparisons  Table 7 Value: Selected commodities and groups, 1963-64 with comparisons  Table 8 Quantity: Selected commodities and groups, 1963-64 with comparisons  Table 9 Quantity and value: Agricultural commodities, 1962-63 and 1963-64	20 21-22 23-24 25-40

#### Explanatory Note

U. S. foreign agricultural trade statistics in this report include official U. S. data based on compilations of the Bureau of the Census. Agricultural commodities consist of (1) nonmarine food products and (2) other products of agriculture which have not passed through complex processes of manufacture such as raw hides and skins, fats and oils, and wine. Such manufactured products as textiles, leather, boots and shoes, cigarettes, naval stores, forestry products, and distilled alcoholic beverages are not considered agricultural.

The trade statistics exclude shipments between the 50 States and Puerto Rico, between the 50 States and the island possessions, between Puerto Rico and the island possessions, among the island possessions, and in-transit through the United States from one foreign country to another when documented as such through U. S. Customs.

EXPORTS The export statistics also exclude shipments to the U.S. armed forces for their own use and supplies for vessels and planes engaged in foreign trade. Data on shipments valued at less than \$100 are not compiled by commodity and are excluded from agricultural statistics but are reflected in nonagricultural and overall export totals in this report. The agricultural export statistics include shipments under P.L. 87-195 (Act for International Development), principally sales for foreign currency; under P.L. 83-480 (Agricultural Trade Development and Assistance Act), and related laws; and involving Government payments to exporters. (USDA payments are excluded from the export value.) Separate statistics on Government program exports are compiled by USDA from data obtained from operating agencies.

The export value, the value at the port of exportation, is based on the selling price (or cost if not sold) and includes inland freight, insurance, and other charges to the port. The country of destination is the country of ultimate destination or where the commodities are to be consumed, further processed, or manufactured. When the shipper does not know the ultimate destination, the shipments are credited to the last country, as known to him at time of shipment from the United States, to which the commodities are to be shipped in their present form. Except for Canada, export shipments valued \$100-14,99 are included on the basis of sampling estimates; shipments to Canada valued \$100-14,999 are sampled.

IMPORTS Imports for consumption consist of commodities released from U.S. Customs custody upon arrival, or entered into bonded manufacturing warehouse, or withdrawn from bonded storage warehouse for consumption. The agricultural statistics exclude low-value shipments from countries not identified because of illegible reporting, but they are reflected in nonagricultural and overall import totals in this report.

The <u>import value</u>, defined generally as the market value in the foreign country, excludes import duties, ocean freight, and marine insurance. The <u>country of origin</u> is defined as the country where the commodities were grown or processed. Where the country of origin is not known, the imports are credited to the country of shipment.

Imports similar to agricultural commodities produced commercially in the United States and others that are interchangeable in use to any significant extent with such U. S. commodities are <u>supplementary</u>, or partly competitive. All other commodities are <u>complementary</u>, or noncompetitive.

Further explanatory material on foreign trade statistics and compilation procedures of the Bureau of the Census is contained in the publications of that agency.
